

Floor Type Vacuum Skin Packaging Machine DJL-330VS/DJL-440VS

Floor-type vacuum skin packaging machine is appropriate for cooked meat, frozen fresh meat, seafood, fast meal, poultry meat, and vegetable, etc. The device applies to the PLC control system. Customers can set parameters such as raising or lowering the temperature, extending or shortening the vacuum time, etc to achieve the effect that they want. And through the control panel, we can see the working status of the machine. It is worth mentioning that our machine is very easy to operate. It can help customers stay away from tedious steps to improve efficiency.

As a large-scale semi-automatic vacuum skin packaging machine, it has a large capacity. If the dimension of the customer's tray is large, such as 380*260*50 (mm), we can seal two trays per time. If its dimension is small, we can even seal eight trays per time. There is no doubt that the machine is more efficient compared with the small type. In addition, the mold is easy to install and detach provided that it is safe.

Technical Specification

Model	DJL-330VS	DJL-440VS
Max. Tray Dimension	390mm×270mm×50mm (one tray) 270mm×180mm×50mm (two trays)	380mm×260mm×50mm (two trays) 260mm×180mm×50mm (four trays)
Max. Width of Film	320mm	440mm
Max. Diameter of Film	220mm	
Packaging Speed	3 cycle/min	
Vacuum Pump	40m ³ /h	100m ³ /h
Voltage	380V/50Hz	
Power	2.8KW	5.5KW
Net Weight	215kg	365kg
Gross Weight	260kg	415kg
Machine Dimension	1020mm×920mm×1400mm	1200mm×1170mm×1480mm
Shipping Dimension	1050mm×1000mm×1600mm	1290mm×1390mm×1700mm
