

Automatic Overwrapping Machinery

Features

1. Automatic feeding, conveying, stacking, coating, forming, sealing, counting, etc..
2. The machine can be used independently or can be used as an automatic production line with laser marking machine, cartoning Machine etc..
3. The use of folding angle packaging make it more perfect and improve anti-counterfeiting ability
4. In the packaging process, when supplying box, the machine can automatically turn on; otherwise stop when there is no box.
5. Simple operation, the packaging form can be customized. and the size can be adjusted in the range of packaging.
6. Measuring instrument and apparatus are in accordance with the legal measurement units
7. The machine has compact structure, advanced performance, stable running, high efficiency, energy saving, stepless speed regulation.

Technical Parameters

Speed of Packaging	(10-30) packaging boxes per minute
Packaging size range(mm)	Length (300-80)×Width (200-50)×Height (125-30)mm
Packaging film	BOPP, PVC
Thickness	0.021-0.028mm
Width	Based on the dimension of box
Sealing temperature	100-150℃
Power supply	50HZ/AC380V
Total power	3.5KW
Working pressure	≥0.3MPa
Integrated noise	<69dB(A)
Dimensions	1800-850-1200mm
