

DSL160 Strip Packing Machine

The DSL160 Strip Packing Machine is designed to pack capsules, tablets, or similar products.

Features:

- Feeding, sealing, slitting, and cutting are done automatically. reducing labor costs and therefore, reducing production costs.
- The exterior of the machine is made of high-grade stainless steel, in conformity with "GMP."
- Compact and simple construction allow for easy maintenance and straightforward operation.
- The format changeover can be easily done within 40 minutes.

Technical Parameters

- Output (variable according to packing size): ≤ 800 pcs/min
- Max. Machine Speed: 60 punches/min
- Max. Width of Packaging Material: ≤ 160 mm
- Machine Power: 2.2kw
- Machine Dimension (L×W×H): 1200×850×1700mm
- Machine Weight: 450kg
