

WP-CS Automatic Carton Shaping And Sealing Machine

Feature:

- ◎The machine is manufactured using international advanced technologies. Parts, electric elements, and pneumatic elements are imported.
- ◎The machine adopts vertical carton paper storage mode, so carton paper can be fed at random without machine stop.
- ◎The machine can pack and use carton paper of the same type concurrently. To change the carton paper specifications, manually make adjustment. The adjustment takes about one to two minutes.
- ◎The machine boasts rationalized design and concurrent shapping. Both the fold bottom and sealing bottom are shaped at one time.
- ◎The machine is compact in volume, and its parts are precise and durable. It runs stably without vibration. The machine has long service life and high running efficiency.
- ◎The machine is installed with a plexiglass protection cap to avoid operation accident.
- ◎The machine can be operated independently or work with an automatic packaging line.

Specifications

Model	WP-CS
Carton Opening Speed	0~12 cartons/min
Carton Inventory	1000mm
Carton Dimension	L*W*H=(250~450)*(150~400)*(100~400)mm
Applicable Tape Size	48mm, 60mm, 75mm
Power Requirement	2000W/220V/50(60)Hz
Air Pressure	6kg/cm ³
Air Consumption	450NL/min
Machine Size	L*WH=2000*1900*1450mm
Machine Weigh	450KG
