

Double head sleeve labeling machine BCSLT100-02

This equipment is widely used in beverage, beverage, dairy products, cosmetics, spices, pharmaceuticals, health care products, chemicals, candy toys, sewing thread, tape, electronic products and other industries.

Application examples: round bottle sleeve, square bottle sleeve, flat bottle sleeve, cup sleeve, conical sleeve, shaped sleeve, empty bottle sleeve, bottle (barrel) neck sleeve.

Features:

- In order to meet the market demand at home and abroad, our company has developed a double-head structure, which can meet the requirements of simultaneous labeling of bottle mouth and bottle body.
- One machine with two uses can reduce one standard machine and save cost.
- Shorten the length of conveying line or avoid secondary handling, improve production efficiency and reduce equipment floor space. Shorten the process flow and improve product quality.
- This equipment has high precision and is suitable for various bottle types.

Technical Parameters:

Model	BCSLT100-02
Capacity	100 bottle/min
Label thickness	0.03mm~0.13mm
Applicable label length	30mm~250mm
Applicable cylinder body diameter	28mm~125mm
Voltage	3P 220/380V 50/60Hz
Power	2.5KW
Weight	1200KG
Machine size	L:2500mm W:900mm H:1900mm
