

LT-300G Automatic Tin Can Sealing Capping Machine

Can sealing machine is designed to automatically place lids onto cans and then seal them to ensure the contents remain airtight and protected from contaminants. This machinery plays a crucial role in food, beverage and other industries where products are stored in cans.

Technical Parameters

Model	LT-300G
Voltage	110/220V 50-60HZ 1.9KW
Can height	40-200mm(Can customize for other sizes)
Can diameter	35-130mm
Working speed	30-50 bottles/minute (depending on bottle and caps)
Working pressure	0.4-0.8 MPa
Machine size	About 3000* 900*1700mm
Machine weight	About 500KG
