

A720 Cooking Oil Bottle Labeling System

A720 Cooking Oil Bottle Labeling System is an ideal choice of labeling equipment that satisfying three sided labeling or wrap-around labeling requirement for food & cooking oil manufacturing industries. Special labeling mechanism with label position registration devices make full loaded oil bottles auto-labeling process practical, with one machine versus multi bottle specifications. It can be operated either in stand-alone mode or integrated with the existing filling and packaging line in fully automatic system.

- Design features ensure precise and smooth labeling on rectangular & round bottles for food and cooking oil industries. It's all-purpose, stable & durable, such as automatic 3-sided labeling on rectangular or oval bottles after filling.
- Unique bottles feeding mechanism guarantees the stable and high speed operation.
- Special label pressing device ensures 3-sided rectangular bottle auto-labeling practical.
- Resolve the auto-labeling technical.
 - problems for the cooking oil manufacturing industry
 - Smoothen the corner labeling on rectangular bottles
 - Ensure feeding process reliability with reference to the corner labeling requirement
 - One labeler for multi-bottles packaging line
 - Applying labels onto the full loaded cooking oil bottles on slippery conveyer
- Highly user friendly interactive touch-screen control.
- Intelligent label quantity management, warning message and optional visual inspection devices.

Technical Parameters

Model :	A720
Name :	Cooking Oil Bottle Labeling System
Capacity :	45pbm
Weight :	600kg
Electricity:	220VAC±5% 50Hz 1.04kW
Dimension(for reference) :	(L)2,400×(W)1,150×(H)1,200 mm
