

SP-203P Vertical Form-Fill-Seal Machine for Liquid

For packaging liquid and paste products. such as black tea, ketchup, water, floor wax, etc.

Features

- This machine is ideal for packaging various liquid products.
- Employs German photocell sensor for accurate control of bag length.
- Employs Japanese thermostat for fast heating and superior performance.
- The parts through which liquid flow are manufactured from stainless steel or Teflon, conform to sanitation standards.
- Convenient, fast adjustment to suit various bag lengths.
- Accurate volume filling achieved by precise piston pump.

Specifications

Model	SP-203P
Bag Shaper	3-Side
Film Width	60 - 160 mm
Bag Width	30 - 80 mm
Bag Length	50 - 120 mm
Packaging Speed	40 - 80 bags/min
Volume Range	50 - 200 cc
Power Source	AC 110V 220V, 50/60Hz
Power Consumption	1.35 KW
Machine Dimensions	1000x600x1750mm
Case Dimensions	1100x700x1900mm
Machine Weight	320 kgs
Shipping Weight	430 kgs
