

## Horizontal Continuous Sealing Machine SF-150W

SF-150W horizontal continuous sealing machine is suitable for sealing all kinds of plastic film and making bags. It can be widely used in food, medicine, daily cosmetics, native products, chemicals, electrical components, vegetable seeds, cultural relics and other departments. It is the sealing equipment for batch use in factories, stores and service industries.

The horizontal continuous sealing machine adopts the electronic constant temperature automatic conveying device, which can manufacture plastic film bags of various switches, and can be applied in various packaging lines, and the sealing length is not limited; the sealing efficiency is high, the sealing quality is reliable, and the structure Reasonable and easy to operate.

### Features Overview

- Adjustable temperature and speed.
- Cooling fan protect film from wrinkle.
- Durable heater and moto.
- Work smoothly without wear and tear.
- Emboss number and letter.

### Technical Parameters

Model	SF-150W	
Power supply	220±10V, 50HZ; 110V 60Hz	220±10V, 50HZ; 110V 60Hz
Total power	620W	620W
Sealing speed	0 - 20 m/min.	0 - 20 m/min.
Sealing width	10 mm (20mm, 25mm customizable)	10 mm (20mm, 25mm customizable)
Temperature range	0-300 ° C	0-300 ° C
Sealing length	no limit	no limit
Sealing thickness	0.02 - 0.8 mm	0.02 - 0.8 mm
Maximum loading	≤ 8kg	≤ 8kg
Weight	N.W: 25 kg, G.W: 27 kg	N.W: 25 kg, G.W: 27 kg
Dimensions: Horizontal	L850*W420*H320mm	L850*W420*H320mm
