

YNGG-4 Bottle Filler Machine Liquid

The bottle filler machine liquid is a new machine designed by our company on the basis of the characteristics of several famous brand filling machines at home and abroad, combined with the experience of the company's years of production filling and the needs of the customers. The equipment can draw lessons from the good performance of high quality filling equipment at home and abroad. The filling is fast and slow, no spillover, no drip filling finished, and the device has the characteristics of compact structure, simple operation and high degree of automation. It is really easy to adjust, no bottle and no filling, and the quantity of filling is accurate.

Technical Parameter:

model	YNGG-4
voltage/powder	220V/50HZ 200w
filling speed	About 10 bottle/nozzle/min
packaging error	≤ 1%
packing rang	10-100ml 20-200ml 50-500ml 100-1000ml 260-2600ml 500-5000ml
filling nozzles	2, 4, 6, 8, 10
machine size	2200*1000*1850mm
