

QDX-500 Semi Automatic Tabletop Screw Capping Machine

The QDX-500 Semi Automatic Screw Capping Machine is the high-efficiency, integrated solution designed to tackle the unique challenges of securing specialty closures. In the cosmetics, pharmaceutical, and daily chemical industries, securing caps like spray caps, pump heads, and droppers requires extreme precision and consistent torque to ensure zero leakage and maintain product integrity.

This machine serves as the perfect bridge between manual inefficiency and a costly, complex automated line. By providing stable lateral pressure and adjustable torque control, the QDX-500 Semi Automatic Screw Capping Machine guarantees that every cap is perfectly sealed without causing abrasion or slippage. Its compact, integrated design makes the QDX-500 Semi Automatic Screw Capping Machine an indispensable asset for small-to-medium enterprises seeking reliable, high-precision sealing with minimal footprint.

Technical Parameters

Model	QDX-500
Power Supply	220/110V 50/60HZ
Power	600W
Capping Speed	10-30 Bottles/Min
Cap Diameter	20-50mm
Bottle Diameter	20-120mm
Conveyor Width	can be adjusted according to bottle size
