

SED-16CXP Drum Type Automatic Bottle Washing Machine

SED-16CXP Automatic Drum Type Bottle Washing Machine is mainly suitable for bottle cleaning of round or special-shaped bottles of various materials of 10-200ml.

After the bottle is ultrasonic, washed once and washed twice, the remaining water droplets in the bottle are refined by high-pressure gas, which is called "three water and one gas" for short.

Feature

1. Clean air: On the basis of ultrasonic pre-washing, the equipment uses a needle tube to perform two water (one tap water, one purified water) and two air flushes (depending on specifications and cleaning requirements) on the bottle mouth.
2. Specific materials: All parts in contact with liquid on the machine are made of 316L stainless steel and non-toxic and corrosion-resistant materials.
3. Environmental sealing: All working areas are sealed with transparent plexiglass to prevent pollution from the external environment, and meet the requirements of pharmaceutical production GMP specifications and verification.

Product Parameters

Application	Round bottle, Shaped bottle
Applicable specifications	10-200ml
Production capacity	20-80bottles/min
Power	220V
Clarity qualified rate	≥99.9%
Machine Size L × W × H (mm)	1600mm×900×1200mm
Machine Weight	300kg
