

SED-1KJ-G Automatic Coffee Capsule Filling Packing Machine

Coffee capsule filling machine is a full automatic packaging production line. This machine adopts stainless steel fuselage, accords with hygienic requirements and cleanliness.

And it is specialized for producing coffee capsule to be filled and sealed.

It can be applied to nespresso, k cup from automatic lift cups, quantitative filling, heat sealing system, and a series of processes can be automatically completed.

We possess more than ten years experience of production in this line. The advanced technology and equipment in the industry adopt the famous brand control system and pneumatic components in Japan, Taiwan and China, which has the characteristics of low failure rate, stable operation and long service life.

Product Parameters

Model:	SED-1KJ-G
Capacity	1000-1200 cups per hour(2cups)
Power Supply	1.1kw
Overall Dimensions:	120*120*180 cm
Net Weight:	380Kg
