

SH100-600 Powder Blender Machine

The Grand powder blender incorporates cutting-edge technology developed both in China and abroad, making it one of the most advanced powder blenders available.

Unmatched Performance & Cutting-Edge Technology

Unlike traditional two-dimensional mixers, our pharmaceutical mixer offers:

- ✓ **Superior Mixing Uniformity** – The innovative 3D motion technology enables multi-directional movement including rotation, inversion, and tumbling. This ensures consistent blending, even for materials with different particle sizes, densities, and temperature properties.
- ✓ **GMP-Compliant & Hygienic Design** – All contact parts are made of imported stainless steel, ensuring corrosion resistance and contamination-free mixing. Mirror-polished interiors facilitate easy cleaning, preventing cross-contamination in pharmaceutical processes.
- ✓ **High Efficiency & Large Capacity** – With an 85% charging coefficient, our mixer optimizes the use of mixing space, reducing cycle times and improving production efficiency in pharmaceutical and chemical applications.

✔High Efficiency & Large Capacity – With an 85% charging coefficient, our mixer optimizes the use of mixing space, reducing cycle times and improving production efficiency in pharmaceutical and chemical applications.

Specifications

Weight(KG):	50
Applicable Industries:	Production workshop, food and beverage processing plant
Core component warranty period:	3 year
Core Components:	Motor
Voltage:	220v/380v
Evaporation capacity (kg/h):	5
Material:	304 stainless steel
Mixing Capacity:	150-400 kgs/time
Weight:	500kg
Dimensions:	1500*1000*1400mm
