SK-25A Semi-Auto Vacuum Skin Packaging Machine

For food vacuum packing

Beauty packaging for fresh food- Vacuum Skin Packaging

This machine is suitable for food packaging and does not require manual bagging, which can increase productivity, save manpower and save packaging material costs. Compared with the traditional plastic wrap + Styrofoam box packaging common in supermarkets, there are often problems such as liquid exposure or fresh food movement and deformation.

The new type of skin packaging perfectly attaches the film to the fresh food, so that the food retains its original appearance without deformation, and also allows the juice to be perfectly preserved in the food, and will not gradually overflow with storage time. In addition, the film can also increase the brightness of the food, and it can brighten the appearance as if it can help the fresh food to make the skin beautiful, which is more attractive to consumers!

Features

►Machine action controlled by PLC and touch screen.
►The vacuum pump is imported from Germany.

Functions

The packaged product has the functions of moisture-proof, rust-proof, dust-proof and oxidation-proof, which can improve the shelf life, quality and value of the product.

Applications

Suitable for fishes, meats, cakes, foodstuffs vacuum skin packing.

Specification

SPECIFICATION	SK-25A
Cutting Function	Auto
Skin film width	420 mm
Packing capacity	1~3 cycle/min
Vacuum pump	40M³/hr
Waste film rewind motor	90W*1set
Heater	2.5KW
Machine size	W800*D1200*H1400mm
Power	220V 3Ø 50/60HZ
