

KGF Oral Liquor Filling & Sealing Machine

This machine is the main filling equipment of the oral liquor assembly line, which is mainly applied in the filling, lading, sealing of the 5-30ml EPOL (or aluminum plastic combined lid) straight tube bottle and realize reliable bottle transportation by screw, track the local filling process, and is not easy to produce foam; It transports the lid by electromagnetic vibration with high lading rate. This machine is advanced in its combined filling-sealing operation with the compact structure.

Technical Parameters:

- Production ability: 80-100 bottles/min
- Applied bottle: 5-30ml oral liquor straight tube bottle
- Sealing rate: $\geq 99\%$
- Power supply: 380V, 50Hz Three-phase four-wire
- Power: 1.3Kw
