

TMP-130B/200B Automatic Cellophane Overwrapping Machine

Haichina Machinery Co.,Ltd is one of the best TMP-130B/200B automatic cellophane overwrapping machine manufacturers and suppliers in China, equipped with productive factory, welcome to buy discount and high-quality TMP-130B/200B automatic cellophane overwrapping machine products from us and check the price with us.

TMP-130B/200B Overwrapping machine is a packaging machine that shrink wrap the products. Shrink wrap, also shrink film, is a material made up of polymer plastic film. When heat is applied, it shrinks tightly over whatever it is covering.

TMP-130B/200B Overwrapping machine is semi-automatic and fully automatic wrapping machines. wrapping machines are used for wrapping different kinds of such industries as medicine box, food, beverage, cosmetics, chewing gum, healthy products, tea, condom, cigarette est.,

TMP-130B/200B Automatic wrapper machine has the function of anti-moisture and anti-falsification, with tear tape. Also enhances the product level and additional value. It can connect with Pillow Pack Machine, cartoning machine etc., to form a Production Packaging Line.

Over Wrapping Machine is widely applied in the products, such as Medical box, Gum, Health products, Tea-leaf, Cubic-sugar, Disk, condom, Cigarette, tape, Poker, Soap, Square-share battery, and etc

Overwrapping machine is also known as cellophane wrapping machine is majorly used for perfume carton wrapping, perfume box wrapping.

Overwrapping machine is majorly used for clear film wrapping for condom box, condom cartons.

Overwrapping machine is comes in category of wrapping machine for sealing of cartons.

Carton overwrapping is main application for all types of cartons packing, box packing, in perfume bottles to seal the film for aesthetic sense.

Overwrapping machine is wrapping machine for Bopp film wrapping use.

The machine provides high work speed from 30-150packages one minute, Range of sealing bar widths and a multiple sealing bar option. For all applications that require longitudinal sealing on the bottom of the product.

There are a number of different feeding systems although the standard one has push rods. Provide good protection to products to dustproof waterproof.

Main Features of Overwrapping machine:

1. Compact and reasonable structure, stable and advanced performance, easy and convenient operation and maintenance.
2. Adopt multi-function digital-indication frequency inverter, and steeples a variable sopped.
3. The digital indication of thermal seal temperature is clear.
4. Have the function of automatic feeding and automatic counting.
5. In the driving part, there are all varieties of protection mechanism and indication of malfunction.
6. film-feeding clutch for trial operation is set to save packing material.

Main Technical Parameters of Overwrapping machine

Model	TMP-130B	TMP-200B
Packaging material	BOPP film, PVC film, PVC film	
Production capacity	30-15 packs/min	
Bag size (mm)	L(60-130)*W(40-100)*H(10-40)	L(60-200)*W(40-120)*H(10-60)
Power supply	AC220V 50HZ, 3KW	
Weight	750 kg	850 kg
Out size dimension (L*W*H, mm)	2000*800*1500 mm	2000*900*1500 mm
