

VCZ-B Automatic Inline Capping Machine

VCZ-B Automatic Inline Capping Machine is applied to agrochemical, pharmaceutical, cosmetic (cream, lotion), food industry (heavy sauce with large particulates), daily chemical etc. The max production speed can reach 6000bottles/hour.

Features:

1. The machine is made of good type stainless steel, also applied to GMP standard requirement.
2. It's used for tighten caps to guarantee the capping qualified, in case the cap looses when heated after aluminum for sealing or some bottle missing during the capping process.
3. To cap irregular caps, like caps with nozzles, etc.

Technical Parameter:

Container size Range	Diameter: Φ 35mm- Φ 100mm High: 80mm-280mm
Suitable Cap size range	Diameter: 20mm-55mm
Power	2kw
Power supply	AC 220V ; 50HZ (or according to client voltage requirement)
Tightening Speed	0~6000Bottles/hour
Machine Weight	480kg
Machine Dimension (L×W×H)	1000mm × 700mm × 1800mm
