

NJP-2300D Full Automatic Capsule Filling Machine

Feature:

1. Improves the module turntable the internal structure, using the Japan imported linear bearing, ensure equipment's accuracy and service life.
2. Main transmission shafts bearing block can splits, easy for maintained and fix.
3. High-precision drive system is stable and reliable
4. Electronic control system using Japan Mitsubishi inverter driving, stepless speed regulation Japan Mitsubishi PLC program control, accurate action. Safe and reliable, at the same time having feeding, automatic feeding two functions optional.
5. Configure the pellet mechanism.

Technical Data:

Model	NJP-2300D
Production efficiency	2300 Capsules/Min, Max. 138000 Capsules /H
Hole number	18
Index table	12 partition seal type
Dividing device	RU140, RU110 Dividing Box Serial
Capsule size	00# 0# 1# 2# 3# 4#5#
Capsule size for pellet	0# 1# 2# 3# 4#
Total power	5.85 kw
Weight for main machine	1890 kg
Dimension for main machine	1254×1014×2027 mm
Annex machine	XCL-36 Cleaner
Vacuum pump	1.5 kw water ring pump
