

HM OCTEM 100 - Full Automatic Double Sided Containers Self Adhesive Labeling Machine

Product Details

The machine is able to label self adhesive tapes onto two opposite sides of various kinds of containers such as tin can, glass bottle, pet, pvc and coax bottles without issues.

In addition, as optional, the devices that stamps production number and date can be added to the system.

PS. The machine can also be modified to label on round containers together with double sided containers.
