

PA2000 I-C

Template type counting machine (also can choose grain test and reject device)

Introduction:

The machine is designed by adopting an unique panel-counting board, it can not only count and fill tablets and pills but also hetero-shapes and capsules. Among which the structure of "Eccentricity Sifting" is designed and innovated by our company and we also have the patent for it. At the same time, we win through a series of problems such as overcoming large noises of the gear driver, easy mangling and difficult adjusting, etc. The mainframe, which is designed adopting hyper stillness of the noise, frequency timing the controlling system adopts the programmable controller of the PLC produced by PANASONIC with reliable operating. A photoelectric control system is used to guarantee automatic halt when the bottle is blocking or lacking. In addition, the machine is also preventing from over loading, over current, under voltage or over voltage. The material with medicine conforms to the requirements of GMP requirement completely.

The machine is also preventing from over loading, over current, under voltage or over voltage. The product conforms to the requirements of GMP completely.

Applications:

This machine used the secondary structure of "Eccentricity Sifting" which is designed and innovated by the factory and also have the patent for it. The mainframe, which is designed adopting hyper stillness of noise, frequency timing, the controlling system adopts the programmable controller of the PLC with reliable operating. A photoelectric control system is used to guarantee automatic halt when the bottle is blocking or lacking. In addition, the machine is also preventing from over loading, over current, under voltage or over voltage. The material with medicine conforms to the requirements of GMP completely. the maximum capacity is 24000 grains/min. (1000 grains package)

Main Technical Specifications	
Model:	PA2000I-C
Quantity:	1 set
Size of bottles:	20-300 ml
Size of tablets/capsules	Φ5mm-Φ12mm/0#-4#
Output:	25-40 bottles/min(depended on the bottles)
Power supply:	AC220V 50Hz
Power	1.2Kw
Diameter of plate	495mm
weight	355Kg
Net dimension(mm)	1650*680*1580.
