

DZH-100 Automatic Blister Cartoning Machine

This machine is a new modern machine which designed by our company who integrated domestic and foreign vanguard technology. It is a high technology product incorporates pneumatic, photo, electric, mechanic of all in one machine. It improved by a large margin on machine performance and working efficiency, carry out encasing fast demand, keep running steady and reliable when running fast. This machine is applicable for encasing the blisters with similar product into box. It can carry out leaflet folding, carton opening, encasing, date coding, carton closing automatically. It adopts PLC control, photo electricity super vision to coordinate with every parts action. When the machine in error, the machine stopped automatically and display the error reason so that can solve the problem in time.

TECHNICAL PARAMETER

Output Capacity(box/min)	50-80
Volume of Consumption (L/min)	120-160
Box Requirement(g/m ²)	250-350
Box Size(mm)	Max Size 200×80×50
	Min Size50×20×14
Leaflet Requirement(g/m ²)	55-65
Leaflet Size (mm)	Max Size 240×190
	Min Size80×90
Power Supply	AC 220V 50HZ 2.1KW
Overall Dimension(mm)	3100×1100×1600
Weight(KG)	1500
