

Straight Automatic 6-head Paste Filling Machine with Conveyor PLC Control

This series of liquid filling machine is suitable for filling different types of liquid products in daily chemical, food, grease, medicine, pesticide and other industries. The piston injection filling and three way one-way valve device has the advantages of high filling accuracy, convenient installation and debugging, simple cleaning and cleaning, and no leakage.

Product parameters:

- Voltage: 220V/110V 50/60Hz
- Power: 0.5KW
- Dimension(L*W*H): 2600(L)x1500(W)x1900(H)MM
- Weight: 750kg
- Model: Six head straight paste filling machine
- Power: 500W
- Power supply: AC220/100V 50/60Hz
- Air pressure: 0.5-0.7Mpa
- Speed: 50-60/min
- Accuracy: $\pm 1\%$
- Number of filling head: 2;4;6;8(customize)

The application of products:

Applicable to Beverage, Chemical, Commodity, Food, Medical
