Automatic Side Sealing Machine

The Advantage machinery Side Sealer Series is great machine for high speed packaging applications. The machine is controlled via a touch screen control which allows the operator to set the different times for the sealing operation, the temperature of the blades and also the length of film that is to be used. The machine has a variable conveyor speed controller which makes the machine ideal for both manual and automatic feeding. The machine is very efficient and user friendly. Some of its features are:

- Touch Screen Control.
- Quick change over between productions and sizes.
- Horizontal and Vertical sensors for the packing of different products.
- Solid knife sealing blade makes a consistent seal and is long lasting.
- Intermittent Sealing Motion (Side Seal) allows for infinite product lengths.
- Automatic film advance allows for light weight products to easily be fed through.
- Automatic waste removal system.
- Can use with existing tunnels or you can choose from our wide selection.

Model SS-530	Inches	Metric
Product Size (LxWxH)	(2"-Unlimited) x (1"-17 3/8") x (1/8"-7 1/8")	(50-Unlimited) x (25-440) x (2-180)
Max. Film Width	26"	660
Max. Speed (Pieces/min)	60	60
Conveyor Speed (ft/ min)	130	40
Sealing Bar Width	20.86	530
Power (Volt./ Ph./ Amps/ Kw)	220/ 3/ 16	3.5
Overall Dimensions	80 1/2" x 65 3/4" x 55 3/4"	2045 x 1670 x 1415
Air Consumption (PSI)	55	4
