

Round Container Labeling Machine SL-4318

Features:

1. Be applicable to abundant production in medicine, cosmetics etc. Hot printer and automatic feeder are available.
2. The machine adopts the special structure of air driving and roller labeling, so labeling is very precise.
3. The machine is particularly applicable to circle label for big round bottles. No detacher makes the machine more concise and efficient. The range of labels is extended because of high-power serve motor. It solves the common problem of the insufficient strength.
4. The machine adopts our company patent technology. The inaccurate labeling is reduced largely because of the structure of three rollers automatically locating.
5. It can be choose to label one piece or two pieces. And it can label the washing hand liquid bottles in front and back at the same time.

Parameters:

- producing speed: Max 80 bpm
- labeling accuracy: $\pm 1\text{mm}$
- label max width: 200mm (can be raised according to the require)
- tube diameter: $\phi 30\text{-}\phi 80\text{mm}$
- label inner diameter: $\phi 76\text{mm}$
- label outer diameter: Max $\phi 350\text{mm}$
- outline size: 1520x700x1400(mm)
- using power: 220V 50Hz 1500W
