

Auto Filling Machine Ultrasonic Plastic Tube Sealing Machine LD-T009

Application:

Suitable for various plastic tube, aluminum laminated tube sealing of cosmetics, pharmaceuticals, chemicals, food and other industries.

Kindly Reminder:

We have experienced team of R & D engineers who can customize packaging solutions according to your product characteristics.

Description:

Main Features:

1. Easy to operate and maintain.
2. Automatic positioning, filling, welding, cutting and trimming, printing code in one time.
3. Stainless steel machine body, strong and beautiful looks,
4. Sealing mould can be customized according to customer requirements. Can seal many size of tubes.
5. Ultrasonic Sealing Machine power source for the pneumatic, working steady, not easy to damage, customers can rest assured use.
6. Ultrasonic frequency can meet international standard, no harmful to human being or environment
7. Can be work in time, not need wait the heat time.

Advantages:

1. It adopts Ultrasonic sealing machine, good for difference products, Such as food, medical, cosmetic products. It will not hurting the products.
2. Overload protection, phase separation protection, power-fail protection.
3. Large Ultrasonic output power to ensure the sealing quality of various tube size and material.
4. With tube end trimming
5. Easy change working mold for difference tube diameter
6. Adjustable tube length
7. Machine include a gear pump filler (Good filling precision+- 1)

Parameter:

Model	LD-T009
Sealing Dia	5-50mm
Output power	2000W
Voltage	AC220V/single phase 50/60HZ
Machine weight	230kgs
After packaging	280kgs
Machine size	1300*900*1550mm
Filling Range	A:6-60ml, B:10-120ml, C:25-250ml, D:50-500ml (Customer made available)
Control Style	PLC control
Time adjust	electronic adjust
Packaging	Plywooden case packaging
