

Stick Automatic Packing Machine 10 Row (Powder) PST-10R

Feature:

- Packing length can be adjustable by touching of monitor which enables by independent Servo Motor.
- Highly precise I-Mark sensing and servo drive leads precise packing as well as less noise.
- This machine seals products twice consecutively for perfect sealing.
The product cutting is being done at the same time the machine does the secondary sealing.
- This machine rarely generates errors in production speed or packing sealing compared with a single sealing.
- Alarm gives notice 2 minutes prior to the film is finished.
When the film is completely consumed, the machine will stop at its designated position.
- The film board can be adjusted to left and right and the phototube can be calibrated to front and back.
- Adjusting handles are located in front of the machine for easy operating.
- A variety of safety devices installed in a machine and alert when any doors opened or hot-wire snapped via buzzer sounds.
