

HLT-600A Plastic Pipe Filling and Sealing Machine

Characteristics

1. Tube falls, filling, heating, Forming (coding), cutting. No tube, no filling.
2. All components touched with lotion are made of 316 stainless steel, in line with GMP standard.
3. PLC+HMI operation system, parameters set up easily, warning messages, product information and temperature displayed clearly.
4. Electrical and pneumatic components are international brands.

Technical Parameters:

Type	HLT-600A
Flow	Automatic hose entering mold, automatic cursor positioning, linkage filling, heating, fusion forming, pipe tail cutting, finished product output
Disc No.	12
Speed	3000-3600PCS/H
Size	φ16mm -φ50mm L: 50-210mm
Filling Mode	Mechanical Linkage
Filling Accuracy	±0.5g
Power	3Ph 380V / 15KW
Pressure	0.5Mpa
Measurement	L1500mm*W1000mm*2000mm
