

Capsule Pill Counter Machine TPP-SPJ400

The capsule pill counting machine uses an electromagnetic vibration diameter. When the bottle does not turn to the blade, the bottle is not rotated. When the bottle is placed, the motor drives the number plate to rotate to automatically enter the bottle; replace different specifications model count Convenient and fast, there is no need to make other adjustments.

Feature:

- Small digital capsule pill counting machine is small, light, low noise, accurate count, easy to operate, and simple maintenance.
- The semi-automatic tablet counting drug contact site is produced by 304 stainless steel to ensure the cleanliness of the packaging item, which meets the GMP requirements;
- Semi-automatic tablet counting is a drug or food such as capsules, tablets, particles, etc., bottles, bags. The capsule pill counting machine uses an electromagnetic vibration diameter. When the bottle does not turn to the blade, the bottle is not rotated. When the bottle is placed, the motor drives the number plate to rotate to automatically enter the bottle; replace different specifications model count Convenient and fast, there is no need to make other adjustments.
- This capsule pill counting machine is currently small, convenient, and cost-to-eat, bag equipment for domestic counting machinery.

Technical Parameters:

Model	TPP-SPJ400
Hopper Diameter	400mm
Capacity	12-26bottles/minute
Main motor power	15w 220v
Vibration motor power	120w 220v
Dimension	420*420*750mm
Gross weight	50kg
