

## *HU-160A Automatic In-line Capping Machine*

HU-160A automatic in-line capping machine has beautiful appearance, dexterity, fast capping speed and high qualification rate. It can be applied to different bottle-shaped caps in food, pharmaceutical, daily chemical, pesticide, cosmetics and other industries. The four speed control motors are used for capping, bottle clamping, conveying and capping. HU-160A automatic plastic bottles capping machine has high degree of automation, good stability, convenient adjustment, no need for spare parts when changing the bottle type or cover, just need to make adjustments (such as The upper cover can be used for automatic cover).

### **Technical Parameters:**

- Model: HU-160A
- Production capacity: 160 bottles / minute
- Cap size: 15-70 mm
- Working pressure 3-5 kg/cm<sup>2</sup>
- Bottle height: 38 - 300 mm
- Bottle diameter: 50-320 mm
- Machine size: 2200×870×1500 mm
