

JHC Tube Filling & Sealing leak machine

The leak machine aim at the test of end capping sealing effect after filling and sealing to avoid rejects flowing into finished products packing area.

Features:

1. Conveyor transfer 4pcs one time
2. 4 pressure can set respectively, the maximum is 150 pound
3. It has no condition of scratch or compression deformation
4. The test numerical value can save to USB flash disk
5. The test numerical value is graph and convenient perceptual intuition
6. Colors man-machine touches panel connector. Numeric control is convenient and precision

Capacity:

8-12 mould/min (32-48pcs/min), it depends on Operation proficiency.

Technical Parameters:

Outer size	100 x 96x 196 cm
Voltage	AC 220V, 60Hz, 1PH, 2A, 0.5KW
Air pressure	4~7 kg/cm ²
