

Small Tea Bag Packing Machine YSDT

Product introduction:

1. Suit for packing Da Hong Pao tea, black tea, green tea, Tieguanyin, Rock tea, etc, strip-type and particle type of tea. It adopts micro-computer, photoelectric technology control. high precision, high speed and good quality. Very easy to operate.
2. Projectile feeding not squeeze the damage materials, especially for packing fragile materials.

Main features:

- A. Uses high quality imported chips which make the packaging more accurate and with a higher speed. User-friendly design, easy to operate.
- B. With intelligent speed automatic transmission, it need no extra adjustment. Higher power.
- C. Computer intelligence clear material, reduce time-consuming.
- D. Overweight alarm, reduce waste.
- E. With stainless steel feeding, the passage is clean and environmental protection, does not break material.
- F. Multiple shock absorption structure makes it running smoothly with low noise.

Technical parameter:

The tea bag filler

| model | YSDT |
|-------------------|----------------|
| volt | 220V |
| power | 100w |
| packing weight | 1—25g; 5-99g |
| working speed | 10-30/time/min |
| packing precision | 0—0.3G |
| machine size | 36*41*42CM |
| weight | 22kg |

The tea bag maker

| model | YSDT |
|----------------------|------------------|
| volt | 220V/50Hz |
| max power | 400w |
| packing speed | 700-1000bag/hour |
| bag width | 40-100mm |
| machine size | 400×350×750mm |
