

Four-Side Pressure Side of the Vertical Bag Packaging Machine RL460S4 (RL530S5)

Features:

- Intelligent integrated temperature control, temperature adjustment on the big touch screen to adjust.
- Pull film and horizontal seal using servo, running smoothly, sealing solid, bag-type formation.
- Especially into the bag and vertical seal made of four ironing corner, through the angle of the pocket set, so that the bag can stand, three-dimensional strong.
- The machine has to cut the way to collect the excess side and do not cut off the edge of the way, the former longitudinal sealing interface is not easy to see coincidence, which saves packaging film, the effect is also very beautiful.
- Vertical sealing mechanism to move and fine-tune the convenience of replacement molding machine can be different sizes of packaging size.
- Can be used with a variety of metering capacity, easy to adjust, do perforated bags, filling nitrogen.

Optional device:

- Hook function.
- Cut the edge of the remaining material body.

use:

Suitable for irregular block and granular materials, such as candy, puffed food, small biscuits, roasted seeds and nuts, sugar, frozen food and milk powder, milk tea, starch, seasonings and so on.

Model	RL460S4	RL530S5
Bag type	Four corners of the edge of the self-standing bag type	Four-sided crimp with locking lining
Bag size	Outer dimension: W 80~170mm Front-face bag width	
	Side-face bag width: W40~100mm	
	Bag length: L 100~280mm	
Roll size	Membrane width max 460mm	Membrane width max 530mm
Blanket width	Side seal 4~6mm	Side seal 4~6mm Back seal 10~12mm
	Side-sealing	Side-sealing back sealing
Packaging speed	≤ 50bag/min	≤ 50bag/min
Power and power	AC220V 50-60Hz , 5.0kw	AC220V 50-60Hz , 5.3kw
Total Weight	650kg	650kg
Dimensions	L1750×W1150×H1950mm	L1750×W1150×H1950mm
