

Glass Bottle Water Filling Line

We can provide production line as below:

1. Drinking mineral water complete production line.
2. Fruit juice/milk complete production line.
3. Carbonated beverage complete production line.
4. 3 Gallons and 5 Gallons bottle water complete production line.
5. Wine/alcohol filling, labeling, packaging production line.

Features:

1. This carbonated filling monobloc is made of super stainless steel. It has compact structure, good appearance, scientific and reasonable design. It is available for the bottles from **200ml to 2000ml**.
2. The machine can fill fruit juice, carbonated drink, like coca-cola, soda water, beer, wine, apple vinegar and so on in the glass bottle.
3. This machine adopts advanced bottle neck clamping system, which get rid of the requirement of bottle height. So there is only a few parts need to change while different bottles are used on the same machine, such as the guide plate and the poking wheel.
4. The production capacity of the machine is **5000-20000BPH**, if you have small production, the sole machine is suitable for you. If you have big production, the 3-in-1 machine is suitable for you.
5. It is equipped with high speed filling valve of high precision filling.
6. The capping head adopts constant magnetic torque device to ensure the high capping quality without damage. High efficient cap settling system, cap feeding system and no bottle no cap system make the whole capping system perfect.
7. We also can provide water treatment for 1-20T/H, date printer machine, bottle package machine, label shrinking machine or label machine and so on.
