

## ***SP-50J Three-Sealed Sauce Packaging Machine***

The bag making system adopts stepper motor subdivision technology, controller Chinese characters display, heat sealer four-way control temperature, reliable photoelectric detection system, automatic printing of batch number or production date, and easy tearing of packaging products. The pump body is made of stainless steel and the packing volume can be adjusted steplessly within the rated range.

*Semi-fluid type machine:* With agitator, it can stick slag.

### **Performance parameters:**

<b>Size</b>	<b>SP-50J</b>
Packing speed	28-50 (bag/min)
Measuring range	1-50 or 1-100 (ml)
Bag size length	50-145 width 30-100(mm)
Voltage	380V/50Hz or 220V/50Hz
Power	1.36 (plus stirring 1.42)
Weight	220KG
Dimensions	665×770×1580 or 665×1000×1580 (with additional coder/mm)
Packaging materials	Various composite film packaging materials
Packing material diameter	≤300(mm)
