

Bar Type Tea Bag Packing Machine XY-60BSA

This is a stainless steel made vertical packing machine which is mainly used to pack tea, small granule material.

You can just put the roll film on the machine; it can make it into the bags you want. Such as tea, sugar, rice, salt, beans, washing powder, seeds, etc.

The main features of the tea bag packing machine:

A. automatic tea bag packing machine is the new style equipment, that it can pack, tea powder, tea leaves, small beads etc. it includes electric scale filling machine and automatic bag maker, with reasonable structure, stable performance. It completes tea filling and sealing in one.

B. automatic tea bag packing machine adopts microcomputer control technology, automatic temperature control, automatic bag length setting, and automatic feeding film to achieve optimal packing effect.

C. The automatic tea bag packing machine just adopts a data cable to connect the filling machine and automatic bag maker, reducing the malfunction. Greatly improving the working efficiency

D. Adopts high quality imported chip and longer life, high precision, high speed, user friendly design, the automatic medicine grain bag packing machine is easy to operate.

E. Computer intelligence clear material, reducing time-consuming

F. Electric scale feeding material, high precision, without prejudice broken material

G. Multiple shock absorption structures, automatic tea bag packing machine running smoothly, low noise.

F. This automatic tea bag packing machine suit for many different kind of teas, such as powder tea, tea leaf, small granule material, etc.

Advantages:

1. Key switches plus digital display, reliable operation.
2. Computer-controlled process which makes high precision bags.
3. Automatic tracking color, eliminating false color smartly.
4. Sealing dual temperature control, intelligent temperature control.

Packaging materials: paper / PE, Pt / PE, PET / Plated Al / PE, PET / PE, BOPP film, tea filter paper composite packaging materials can be heat sealed.

Technical parameters:

Model	XY-60BSA
Packing speed	20-50 bags/min
Film width	300mm (Max.)
Making bag size	L30-200mm,W30-140mm
Packing accurate	±1% (depends on product)
Power	1.9KW
Power supply	AC 220V 50/60Hz (can be customized)
Sealing type	Pillow, thress / four sides seal
Net weight	350KG
Machine size	L1500*W700*H1700mm
