

## *LX76UN-IM Full Servo Thermoforming Machine*

### **Design Feature**

1. Produce Disposable cups, lids, dish, containers and trays with round, square and rectangular or other shapes.
2. Servo plug
3. Forming station driven by servo system
4. Servo Index
5. Touch screen and programmable PLC control
6. Retractable, independently operated upper and lower ovens moving forwards and backwards for more even temperature distribution
7. PID temperature control ensures precise temperature accuracy and easy operation
8. Robust design,
9. Little maintenance effort required
10. Most of Components are from multi-national suppliers assures a reliability and worldwide compatibility
11. Auto In-line hole-punch available

## Specification

Model	LX76UN-IM 2in1 LX78UN-IM 2in1
Forming area	760*380mm 780*450mm
Stoke	210mm (250mm at request)
Dry Run Speed	30Cycle/min
Suitable Sheet	PP PS PET etc.
Sheet Width	400-760mm maximum
Sheet Thickness	0.3-2.0mm
Power Supply	3-N AC380V±15V (change is available on extra change )
Heating Oven	83kw
Air Pressure	0.7Mpa
Air Consumption	2000liters
Cooling Water	10 Liters/min @ 15° - 20° C
Dimension	3800mm*1400mm*2350mm
Weight	3000kg
