

## Thermoforming Machine KB Series

The KB models are the new automatic thermoforming machines with a balcony constructed frame and pneumatic actuating systems for packing syringes vials and ampoules in laminated plastic materials. Technical innovations: compact frame, automatic positioning of sealing, perforation and cutting station, operator side reel loading, improved design so using less space in the loading area.

Speed	30 cpm
Forming depth	40 mm
Max forming area	KB260/N: 260 x 260 mm KB320/N: 320 x 260 mm KB350/N: 350 x 260 mm
Forming material	PET, PET + PE, PET-G, PVC, PVDC, PS
Forming material thickness	0,25 - 0,70 mm
Lidding material	PET/PE, Aluminium, Paper
