

Automatic Atmospheric Pressure Washing/Filling/Capping Machine Monoblock CGF-series

This water filling machine is designed for non-carbonated drink filling, such as mineral water, pure water, etc. Its neck-holding conveying system allows different size bottles working on the same machine. Key electric elements adopt international famous brand such as Siemens, Mitsubishi which ensures stable performance

Advantage

1. Bottle washing, filling and capping are integrated in one machine.
2. Auto air blowing conveying for bottle entering.
3. Precise water and beverage filling
4. Auto cap delivering, sorting and capping
5. PLC control, user-friendly screen for easy operation, stable, efficient
6. Apply for bottles from 250ml-2L in one machine if bottle neck is the same

Specification

Model	JND2-2-1	JND4-4-1	JND6-6-1	JND8-8-1	JND8-8-8-4
Production capacity	300BPH	600BPH	850BPH	1200BPH	2000BPH
Suitable bottle size	3L-10L	3L-10L	3L-10L	3L-10L	3L-10L
Power(kw)	5	6	7.5	8	9
Washing heads	2	4	6	8	16
Filling heads	2	4	6	8	8
Capping heads	1	1	1	1	1
Gas pressure	0.5-0.6Mpa				
Power supply	AC220V/380V±5% 50HZ/60HZ
