

Small Round Tea Bag Packing Machine LGXF-660

Small Round Tea Bag Packing Machine is our company absorbed the advantages of the tea packing machine at home and abroad, through transforming and made in China. Since our machine entering the market, it has a good reputation both at home and abroad.

We take the customers need as the aim, try our best to make the customer satisfied.

Small Round Tea Bag Packing Machine is a kind of packaging equipment with glass paper or different specifications of cartons and packaging materials in three dimensions. It is widely used in tea, health food, medicine and other aspects of life.

Description Of Round Tea Bag Packing Machine

1. The appearance of small tea bag packing machine is beautiful, the packaged products are easy to transport, greatly improving the carrying convenience of bulk products.
2. Tea filter paper is used as the inner bag in the small tea bag packaging machine, which can ensure the clean and hygienic tea bag in the bag and meet the standards of food safety protection.
3. Small tea bag packing machine adopts computer control system and drive engine system, which can control the length of the bag and the position of the trademark effectively, and make the packaged products more beautiful. Computer control operation is simple, save labor greatly.
4. Round tea bag packing machine adopts intelligent system control, can guarantee the product qualified rate to the maximum extent, reduces the product unqualified rate effectively.
5. All packaging machines are made of imported stainless steel, which is convenient to clean, safe and reliable and greatly extends the service life of the machines.
6. The ownership bags, measurement, filling, sealing, cutting and heat marking can all be completed automatically in the process of small tea bag packing machine operation. It does not require the complete operation of workers, and can effectively improve the production efficiency.

Technical Data:

Model	LGXF-660
Measuring method	Volumetric method
Thread length	155mm
Bag Size	L:50-75 mm;W:50-80 mm
Measuring range	1-10g
Capacity	50-80 bags/minute
Power	AC 220V/50HZ/1.6KW
Machine Weight	640*1100*1850mm
