

## Nylon Tea Label Tagging Machine KST-FT86

### Application

◆FT86, as the matching equipment with our pyramid tea bag packing machine FC16 / KST-160 series, specially designed to stick tag and string on different blank films, such as Nylon, PLA, Polyester mesh, Non-woven, adopts high-frequency ultrasonic tagging method, and unique W type string folding type, the max length can reach at 190mm.

### Parameters

Model	FT86
Working Speed	60~70 tags/min
Driven	Pneumatic
Tagging Method	<b>High Frequency Ultrasonic</b>
Film Width	120mm, 140mm, 160mm or 180mm
Thread Length	130mm, 150mm, 170mm, 190mm or customized
Thread Type	W type or J type
Tag Type	Square, or Round
Tagging Material	Nylon, Non-woven fabrics, PLA, PET etc which can be sealed by ultrasonic
Air Consumption	0.8Mpa
Power	220V Single phase 50/60Hz
Weight	600kg
Overall Dimensions	1200 *1200 * 2400mm
