

Granule And Powder Packing Machine - DXDK140E

The granule and powder packing machine is widely used to pack granule and powder in 3 or 4 side sealing bag. The process of measuring, bag-making, filling, sealing, printing and cutting can be done automatically

Various Laminate Film, for example: Polypropylene / Polythene, Polyester/Aluminum foil/Polythene, Polyester/Aluminum-plating/Polythene, Nylon/ Polythen, Polyester/Polythene, etc.

The material are include sugar, coffee, milk, season powder, tea etc.

1. Adopts CPU to control each function states, and setup the man-machine conversation interface.
2. The Double channel temperature of the horizontal and vertical is controlled by intelligent temperature controlling device.
3. Intelligent photo cell orientation, transform discretionarily between the light/shade. Strongly anti-jamming, when two bags can't catch up with the upper mark the machine will stop and give an alarm.
4. The packaging speed can be adjusted continuously within specified range. Orientation open mouth and stop.
5. The bag-making of granule and powder packing machine has high precision. Easily Operation and maintain.
6. Measurement adopts adjustable cup method, which is accorded with the national measurement standard.

Technical Parameter:

pouch length	40-200mm
pouch width	30-140mm
pack speed	30-50 bag/min
filling capacity	40-400ml
sealing style	3 or 4 side
measuring method	Cups and auger
consumption power	1.65kw/220 or 380V
dimension:	920mm*1160mm*2100mm
weight	330kg
