

Fully Automatic Intelligent Capping Machine

This product is mainly suitable for plastic or metal screw caps and anti-theft caps of various plastic bottles and glass bottles. The product has advanced design, reasonable structure and simple operation.

Features

1. This product is mainly suitable for plastic or metal screw caps and anti-theft caps of various plastic bottles and glass bottles. The product has advanced design, reasonable structure and simple operation. It is a must for food, medicine, tea and chemical industries. Ideal packaging equipment;
2. The appearance of this product is made of all stainless steel materials, with a simple and beautiful appearance, which meets the design requirements of most standard production workshops;
3. The parts and components of this product are processed with precision, and the production technology and process have been accumulated and continuously improved by our company's long-term customer experience. The key parts adopt unique design, high strength, low noise and good filling performance;
4. This product is in compliance with national standards, ministerial standards, and corporate standards, and is allowed to leave the factory only after strict inspection and testing;
5. Fully automatic production line design, easy to form a production line with filling, sealing, weighing filling system or labeling system

Technical Details

Bottle height	30-300mm
Cap Diameter	18-70mm, can be customized base on product
Bottle Diameter	20-160mm, can be customized base on product
Working speed	40-60 bottles / minute (depending on bottle and cap size and shape)
Working voltage	AC220V/110V 50- 60HZ
Working pressure	0.4-0.6MPa
Dimension	1930x740x1600mm
Packing size	2000x820x1760mm
Weight	300KG
