

5L Large Bottle Hot Melt Glue OPP Labeler PSR-640

PSR-640 rotary type opp labeling machine is design for big bottle, big bucket or other large volume container whether empty or filled, which can satisfy the labeling requirement of 5-15L, 5 gallon, or large volume product and so on. In addition, PSR-640 also suitable for various shape such as round, rectangle, square etc.

Features

1. Adopt novel design idea and advanced manufacturing technology, which makes structure of machine more reasonable and perfect.
2. Star Wheel separation and feeding, correlation design transmission mode high-speed labeling, stable precision.
3. Use PLC man-machine interface control system, which can show the equipments' all kinds of operation parameter at any time, such as speed, production capacity and the temperature of gluewater.
4. Use servo motor to synchronously tracks label supply and use specially designed vacuum drum to ensure precise labeling.
5. The machine also is characterized by high precision, compact structure, refined installation, good stability, low glue consumption and low operating cost.

Technical Parameter:

Model	PSR-640
Capacity	1000-6000 BPH (5L-15L)
Power	12KW
Machine Size	2200L*2300W*2000H(mm)
Container Material	PET , PP , PE ,HDPE , Glass , Metal etc.
Container Diameter	φ150-250 mm
Container Height	300-700 mm (Can be customized if exceed)
Label Roll Inner Diameter	6 inches(152mm)
Label Height	20-250mm
Voltage	AC 3φ 380V/50HZ (Customizable)
Air Pressure	0.6 Mpa
