

## ***Packing Nut Machine TH-PM-G-5***

Automatic packaging machine is a kind of automatic packaging equipment, which is upgraded on the basis of particle packing machine. It can automatically complete all the work such as the measurement, bag-making, filling, sealing, printing batch, cutting and counting and so on, automatically complete the packing of the fine particle-like substance. The electrical-sensor detects the color marks on the packing film to keep a perfect picture on each bag.

### **Advantages of Automatic electronic weighing scale rice packing machine:**

1. Key switches plus digital display, reliable operation.
2. Computer-controlled process which makes high precision bags.
3. Automatic tracking color, eliminating false color smartly.
4. Sealing dual temperature control, intelligent temperature control.

### **Application of Automatic electronic weighing scale rice packing machine:**

1. Granular materials: pill drugs, sugar, coffee , grains, tea, salt, desiccant, seeds and other fine particulate, etc.
2. Fluid and semi-fluid products: juice, honey, jam, ketchup, shampoo, liquid pesticide, etc.
3. Powder products: milk powder, soy flour, spices, wet table pesticide powder, etc.
4. Pieces and capsules : tablets, capsules, etc.
5. Packaging materials: paper / PE, Pt / PE, PET / Plated Al / PE, PET / PE, BOPP film, tea filter paper composite packaging materials can be heat sealed.

### **Applicable products:**

Quantitative weighing of tea, seed, monosodium glutamate, feed, sesame and other daily food, condiment and other particles and strip and block materials.

**Technical Parameters:**

<b>Model</b>	<b>TH-PM-G-5</b>
Machine filling range:	20-1000gram
Power supply:	1.5kw, AC220V 50/60Hz
Filling weight error:	Less than 0.3%
Filling capacity:	25-40bags/min
Machine weight:	300Kg
Size:	1200*600*1900mm
Material:	stainless steel 304
Main configuration:	Four head weigher hopper, 4 electric vibrator,
