

XH-30D Automatic Vacuum Capping Machine

XH-30D automatic vacuum capping machine is a special automatic vacuum capping equipment for glass bottle tinsplate bottle cap. The saucer glass bottle vacuum capping machine includes: in-out tank feeding, in-tank feeder, capper, vacuum Room, capping head and other major components. The device is made of 304 stainless steel, beautiful appearance, elegant structure, PLC electronic optical fiber sensing control. It can achieve automatic access to the tank, automatic cover, vacuum, clamping bottle, capping and other actions, and more applications in the sauce bottles, cans and high-end health food industries, the benefits of using pneumatic and electrical programming controls over mechanical transmissions are: the equipment can be clean and avoid the effects of grease on the production environment and the product, and most importantly, it can monitor and flexibly adjust the index parameters that the product must reach, such as vacuum degree, screwing moment and so on. Pneumatic devices, flexible operation, greatly enhance the efficiency of the enterprise.

Technical Parameters:

Model	XH-30D
Capping speed	20 ~ 35 bottles / min
Applicable bottle diameter	35 ~ 85mm
Bottle height	60 ~ 160mm
Cover thickness	8.6 ~ 16mm
Rated pressure	4-6kg
Voltage	200V 50 / 60Hz
Power	500w
Weight	400Kg
