

Hotpot Flavoring Automated Packing Machine

Hotpot flavoring automated packing machine is designed for thick paste material with granules packing and filling. This machine is of high accuracy and easy for adjusting.

Applicable Material

Mainly used for hotpot flavoring, spicy sauce, fresh spicy sauce, beef sauce, and salted bean sauce filling and packing.

Features:

1. Also suitable for medicine, cosmetic, food, pesticide and special industries, is the ideal packing machine for granular viscous fluid filling.
2. The material contacting parts are made of 316L stainless steel, in line with GMP requirements.
3. Filling valve controlled by the pneumatic valve, filling the higher accuracy.
4. Hot pot packaging material and filling speed can be adjusted.

Technical parameter:

Power	220 / 380v 50/60Hz
Voltage	2.4Kw
Compressed air	0.6-0.8mpa
Filling accuracy	$\leq \pm 1\%$
Optional models	30-125ML, 50-250ML, 100-500M, 300-1000ML
