

## *Granual Cup Filling and Sealing Machine with Weigher GD-W*

Granular Cup Filling and Sealing Machine is suitable for automatic filling of granular materials in food, pharmaceutical, chemical, pesticide and other products. Such as: nuts, peanuts, melon seeds, potato chips, peanuts, oatmeal, penghua food, desiccant, broken tea, granules, coffee sugar, white sugar and various non-sticky loose particles, etc.

### **Product Application:**

1. Automatically complete the measurement and filling work.
2. Chinese and English display screen control system, all stainless steel body, input the number of grams needed to be filled and then start to work, the control system will automatically optimize and match each action to achieve the best filling speed.

For granular product filling, we can use cup system or weigher to size the filling volume.

This model is for reference. All cup fill and seal machine, for liquid, paste, powder, or granule, the molds and process are designed and made according to customers inquiry.

**Technical Parameters:**

<b>Model</b>	<b>GD-W</b>
Capacity	1800 cups/h
Voltage	220V/380V 50/60Hz
Power	0.75KW
Heating Power	1.8KW
Filling	0.5-200g±2%
Temp.	160-240°C
Air prussure	0.5-0.8Mpa
Air Consumption	0.63m <sup>3</sup> /min
Dimension	4000*1000*1900mm(L*W*H)
Weight	About 1300kg
