

## *OC-420AZ Nacho Crispy Chips Packaging Machine*

Characteristics: Stainless steel for the material contacted part and carbon steel for the cover.  
Stable performance - Low noise - Excellent reliability - Easy maintenance - Accurate Weighing.

### **Description:**

1. New design and advanced technology with beautiful appearance and reasonable structure .
2. Imported PLC system of computer control and colored touching screen enable easy operation.
3. Imported film conveying system and color mark sensor achieve accurate position and beautiful package.
4. Automatic and protective warming function makes the loss to the minimum.
5. Intelligent temperature controller with excellent heat balance accommodates various packaging materials.
6. Excellent performance with low noise, good stability and clear sealing pattern.
7. External film placing makes the film installation easier and quicker.
8. Bags diversification provides customers with pillow bags, angle bags, hanging bags, linking bag, etc.
9. All the processes including conveying material, measuring, filling, bagging, date printing and finished good conveying are achieved automatically.
10. Packaging speed and length of bags can be set to some extent without further adjustment and parts changing.
11. Automatic correct function, saving time and packaging material.

### **Application:**

The packaging of various food, chemical products, agricultural supplies, hardware, granule, powder, liquid, sauces etc.

**Machine parameter:**

<b>Model</b>	<b>OC-420AZ</b>
Bag Length	80~300mm
Bag Width	60~200mm
Packing Speed	30~60 bags/min
Bag type	Pillow back seal bag
Max. Film	420mm
Measurement Range	50~1500ml (max.)
Machine Dimension	(L)1100 *(W)1500*(H)1620mm
Machine Weight	750KG
Machine Packing	Standard Export Plywood Case
Voltage	220V,50~60HZ(Customized)
Powder	2.2KVA
Film Roll Diameter	Max.320mm
Film Thickness	0.06-0.08mm
