

Automatic 8 head Rotary Capping Machine SX-8

Brief Introduction:

This capping machine is used for closing plastic caps, especially for the caps which with lock ring. It is widely used in industries like foodstuff, pharmacy, daily chemical, cosmetic, fertilizer etc.

PLC control system, rotary type structure, the machine is with function of automatic cap feeding, loading and closing.

Machine come with 8 capping heads, can be made for screw type cap or press type cap. And there is clutch device on the capping heads to assure the capping effect.

For big size bottles like 2 to 5L, machine will be made with 4 or 6 capping heads accordingly.

Parameter:

Model	SX-8
Speed	5000BPH for 1L bottles
Bottle Diameter	40-100mm
Bottle Height	60-250mm
Cap Diameter	φ20-φ55mm
Capping Head	08.06.2004
Power	2KW
Air Pressure	0.6-0.8Mpa
Voltage	220V 50HZ
Weight	900KG
Dimension	2000*1030*2300mm
